

Letter of Endorsement RE Jerry Sorgento of New Age Solar

Our company has relied on Jerry Sorgento's company New Age Solar and himself personally to represent our company both as a dealer and trainer. Our product requires certified installers for our warranty to be in effect. Jerry and his lead staff have been present to receive training within a month of our original meeting. He promptly installed a complex photovoltaic system on the east coast. We were sufficiently impressed that we began sending clients to him for consultation. We have recommended his company and his design work for projects on the East Coast and across the Caribbean.

When we ran into a design problem on the high profile Whitehall Ferry Terminal we turned to Jerry for a design rework. The new design saved over \$20,000 of materials and untold labor. As a result of his efforts not only were we able to get the project commissioned but it was able to come in according to the original specs.

Jerry has been an effective evangelist for building integrated photovoltaic systems, both for commercial and residential systems. He has educated and advised architects and major electrical contractors on how to best integrate solar PV. We enjoy our collaboration with him and are certain that he will give you excellent value and integrity.

Sincerely,

A handwritten signature in black ink that reads "Joe Morrissey". The signature is fluid and cursive, with a large initial "J" and "M".

Joe Morrissey
