Re: New Age Solar / Jerry Sargento, President

To whom it may concern:

Edison Township was the recipient of a major grant for "green" renovations to the Edison Municipal Animal Shelter. The grant had a number of improvements to the facility including new doors, windows, hot water heaters and the like. It also included funding for roof mounted solar photovoltaic system. This was new ground for us and even though Edison had a great in-house engineering department, we felt the need to hire a consultant to help us through the complexities of this new world.

Mr. Jerry Sargento of New Age Solar was chosen to help us through the difficult process of understanding solar energy systems, the regulatory and incentive requirements and, most, importantly, in designing a system for us within our budget and developing a very specific set of specifications that would be the basis of our public bid package. He did a fantastic job and was always available to us for questions, which in hindsight was absolutely critical to the final success of our project. He delivered what he said he would on-time, on budget, and with complete transparency. We made a great choice and would do it again, if the opportunity presented itself.

The information in this letter is factual: it should not be mis-construed as an endorsement by the Township of Edison of the vendor; and in no way does it imply the results of future project may be equal, better, or inferior in any manner what-so-ever.

Please call me, if there are any questions relative to our project – we are very proud to be the first "green" animal shelter in the State of New Jersey.

Very truly yours,

  
John O. Grun, MS
