

To Whom It May Concern:

New Age Solar has designed and integrated many solar PV installations ranging in size from 10K to 350K, using SolarDock, a flat-roof ballasted mounting system, manufactured by my company. We have been pleased with the efficiency, design and integration aspects of each project developed by our developer/installer partner, New Age Solar.

Based on our success in working with New Age Solar we have in the past directed projects that require design and integration services using our SolarDock system to them, and will continue to do so in the future.

Please let me know if I can provide you with any additional information.

Sincerely,

Ed O'Brien
Partner
